

LARISA MALKOVSKAYA (Somova)

AI Partnerships · Business Development · Developer Ecosystems & Adoption

Remote / EMEA (Luxembourg, CET) | larisamalkovskaya@gmail.com | +352 621 573 885 | linkedin.com/in/larisa-somova | luxpilot.app

SUMMARY

Partnerships and go-to-market leader with 15+ years building developer ecosystems and closing the partnerships that turn complex technical products into adopted, revenue-generating platforms. I recruit and enable partners, run the events and community programmes that activate them, own commercial relationships end to end, and negotiate and close — most recently ~€1M a year in partnership and sponsorship contracts, peaking at €3M in 2025.

What makes me different for an AI role: I don't just sell AI — I build it. I've shipped two LLM-based products myself, with governance layers and API integrations, and my MSc research is on the governed adoption of AI systems. So I speak credibly to founders, developers and engineers, and I understand what it actually takes to move AI from an impressive demo to something an organization trusts and uses. Fluent English (C1), native Russian.

CORE STRENGTHS

Technology & startup partnerships · Business development & deal closing · Developer ecosystems & DevRel · Partner enablement, events & community · AI adoption, feasibility & governance · Applied AI building (LLM products, APIs) · Cross-functional GTM (product, engineering, marketing) · Trusted advisor to founders, developers & CTOs · Pipeline, negotiation & CRM discipline (amoCRM) · Fluent English, native Russian

EXPERIENCE

Founder & AI Builder — LuxPilot

Remote · 2024 – present

- Built LuxPilot, a governed LLM advisory system, developed and defended as part of my MSc research at the University of Luxembourg; shipped a second AI product applying the same architecture.
- Advise deep-tech and AI companies on partner strategy, go-to-market and AI adoption; build and ship LLM-based products hands-on (APIs, governance controls), staying credible with technical teams and founders.

Senior Partnerships & Key Account Manager Tech Internals (contract)

Remote / Europe · Jan 2022 – Sep 2025

- Owned commercial partnerships end to end — recruiting, negotiating and closing; delivered ~€1M a year in partnership and sponsorship contracts, peaking at €3M in 2025.
- Recruited, enabled and co-sold with strategic partners including Nebius and Exness; directed a technology conference in Serbia and personally managed Nebius as a strategic partner across EU, Serbian and post-Soviet (ex-Russia) communities.
- Ran partner events, enablement and co-marketing that activated partners and progressed pipeline; maintained CRM discipline (amoCRM) and forecasting.

Senior Consultant — Partnerships & Developer Conferences Ontico

Remote · Feb 2020 – Jan 2022

- Recruited and managed key partner relationships, using flagship developer conferences as ecosystem, enablement and demand-generation engines.

Head of Communications & Developer Ecosystem Postgres Professional

Jul 2015 – Mar 2020

- Built the developer ecosystem for a leading PostgreSQL vendor — partner programmes, developer community, enablement and content that drove adoption at scale.
- Launched and grew the flagship conference (PGConf) from zero to 700+ attendees; acted as trusted advisor to partners, developers and CTOs, feeding field insight back to engineering.

Head of Events & B2B Community Leading online classifieds & marketplace platform

2013 – 2014

- Built a B2B community and enablement programme — 30+ seminars, 35+ speaking engagements; contributed to regional B2B sales growth from 5% to 20%.

APPLIED AI — PRODUCTS BUILT

- LuxPilot (luxpilot.app) — creator of an LLM-based advisory system with a three-layer architecture: a deterministic governance engine (rules and feasibility gates) sits between user and model, so generation happens only under quality gates and human validation. Governance-first design informed by the EU AI Act; developed and evaluated through MSc research on the governed adoption of AI. Applied, hands-on — not deep ML/research.
- PartyNest — built and shipped a consumer AI product with structured outputs, LLM/NLP orchestration and freemium monetization.

EDUCATION

MSc, Entrepreneurship & Innovation — University of Luxembourg | 2024 - 2026

Thesis: AI-driven marketing architecture for microenterprises — a governed, three-layer meta-model (Design Science Research).

Dual graduate degree — Management & Psychology / Philology & Interpreting — Kuban State University | 2001 - 2006

LANGUAGES

English — fluent / C1 (IELTS 7.5) · **Russian** — native · **French** — elementary (improving)
