

LARISA MALKOVSKAYA (Somova)

AI Partnerships • Business Development • Developer Ecosystems and Adoption

Luxembourg, CET • Remote EMEA / CIS | larisamalkovskaya@gmail.com | linkedin.com/in/larisa-somova | larisaamalkovskaya.github.io

€2.1M average annual close (2022–2025) • €3M in 2025 • 20-partner portfolio
100% eligible-partner renewal, 90% expanded YoY • Annual target exceeded, 2022–2025

SUMMARY

I own partner portfolios and the revenue they produce. Most recently I managed a portfolio of 20 technology partners, closing €2.1M a year in partner agreements on average and growing annual close from €1.4M to €3M between 2022 and 2025. I achieved full renewal among partners eligible for renewal and exceeded target every year. Before that I owned the developer ecosystem of a leading PostgreSQL vendor and the B2B community direction at Avito, running programmes with budgets up to €215K. I build multi-year partner strategies around a partner's real business goal, and lead the cross-functional work that delivers it.

I also build AI products directly: two shipped LLM-based products with governance layers and API integrations, plus MSc research on the governed adoption of AI systems. This lets me talk to founders, developers and engineers as a peer and understand what AI projects need to reach production. Fluent English (C1), native Russian.

CORE STRENGTHS

Technology and strategic partnerships • Business development and deal closing • Portfolio, pipeline and renewals • Developer ecosystems and DevRel • Partner enablement, events and community • AI adoption, feasibility and governance • Applied AI building (LLM products, APIs) • Cross-functional GTM (product, engineering, marketing) • Trusted advisor to founders, developers and CTOs • Commercial negotiation, forecasting and CRM discipline (amoCRM) • Fluent English, native Russian

EXPERIENCE

Independent AI Product and GTM Consultant

Remote • 2024 – present

- Built and launched two governed LLM products alongside MSc research, including LuxPilot (luxpilot.app), an advisory system with a deterministic governance layer.
- Advise deep-tech and AI companies on partner strategy, go-to-market and AI adoption, working directly with technical teams and founders.

Partner Strategy Lead / Senior Account Manager | Tech Internals (contract)

Remote / Europe and CIS • 2022 – 2025

- Managed a portfolio of 20 technology partners, closing €2.1M a year on average and growing annual close from €1.4M in 2022 to €3M in 2025. Average agreement around €105K, largest around €300K. Exceeded my annual target every year, by at least 10 percent.
- Achieved 100 percent renewal among partners eligible for renewal, with 90 percent expanding their commitment by at least 20 percent year on year.
- Ran a four-month average deal cycle (three to six months, depending on the partner's internal process), with 10 to 20 opportunities in the pipeline at any time, and led project teams of up to 10 people.
- Owned multi-year partner strategies, usually planned one to three years ahead, built around each partner's actual business goal: hiring senior engineers, driving B2B or B2D product adoption, or entering a new technical community.
- Designed and ran the full activation programme to deliver that goal: conference presence and technical activations, the partner's own events, content planning for regional developer publications such as Habr, speaker placement, and community touchpoints across the year.
- Advised partners on how to show their technology credibly to a developer audience, from live infrastructure demonstrations to what their engineers should be talking about and where.
- Worked with all stakeholders on the partner side, from engineering leadership to HR and marketing, aligning programmes with internal goals including team motivation and conference participation. Partners included Nebius and Exness.
- Directed a technology conference in Serbia. Maintained CRM discipline (amoCRM) and forecasting.

Senior Consultant, Partnerships and Developer Conferences | Ontico

Remote · 2020 – 2022

- Recruited and managed key partner relationships, using flagship developer conferences as ecosystem, enablement and demand-generation engines.
- Built the partner revenue line from a standing start, growing annual close to around €1M within two years, with partners renewing and expanding year on year.

Head of Communications and Developer Ecosystem | Postgres Professional

2015 – 2020

- Built the developer ecosystem for a leading PostgreSQL vendor, running partner programmes, developer community, enablement and content that drove adoption at scale.
- Launched and grew the flagship conference (PGConf) from zero to 700+ attendees, managing a programme budget of around €215K, and acted as trusted advisor to partners, developers and CTOs, feeding field insight back to engineering.

Head of Events and B2B Community | Avito

2013 – 2014

- Built a B2B community and enablement programme with 30+ seminars and 35+ speaking engagements. Contributed to regional B2B sales growth from 5% to 20%.
- Earlier: senior event and programme roles at BDO and Baker Tilly.

APPLIED AI, PRODUCTS BUILT

- LuxPilot (luxpilot.app): governed LLM advisory system combining deterministic routing, feasibility gates, API integration and human validation. Developed and evaluated through MSc Design Science Research, with a governance-first design informed by the EU AI Act.
- Educational activity planner: built and shipped a consumer AI product with structured outputs, LLM and NLP orchestration and freemium monetization, using the same governed architecture in the education space.

EDUCATION

MSc, Entrepreneurship and Innovation, University of Luxembourg | 2024 – 2026

Thesis: an AI-driven marketing architecture for microenterprises, a governed three-layer meta-model (Design Science Research).

Dual graduate degree, Management and Psychology / Philology and Interpreting, Kuban State University | 2001 – 2006
